Volume 1, Issue 1

New Product for Spring 2010

Better Bilt Earth Anchor Tree Kits
with Gripple® Fasteners

Better Bilt Products, Inc. debuted our new and improved tree anchoring kits featuring the Gripple fastener at the 2010 MidAm show at McCormick Place in Chicago.

We received an enthusiastic “thumbs up” from a number of landscapers at the show for the quick and virtual “tool free” installation that the Gripple allows. No more searching for lost nuts from cable clamps or discovering that needed tools are back at the truck. No turnbuckles are necessary; all kits include a tightening and adjusting release key.

Gripples are adjustable and reusable.

Our Field Engineer, Tim Camp, can be contacted to help answer technical questions with your landscaping projects.

Our products can be purchased on-line at:

cartsandanchors.com.

Top Hat™ Nursery Pot Stabilizer featured at the 2010 MidAm Show

Better Bilt's unique Top Hat™ containerized plant stabilizer system, is designed for the container grower, nurseries and garden centers. The Top Hat's wide and stable platform helps plants resist tip-over and damage during windy conditions and storms.

The Top Hat Container Stabilizer is available in a variety of container sizes ranging from 3 gallon up to 25 gallon. Custom sizes are available, call for quote. Please call 800/ 544-4550 for ordering and sizing information. Specifications and sizing guides can also be found on our website: bbponline.com.

Sample packs are available for purchase at our online store: cartsandanchors.com. The purchase price of the sample pack is refundable with a \$250.00 order. A number of Midwestern and Southeastern nurseries and municipalities are currently using Better Bilt's Top Hat container stabilizers.
