

Better Bilt Products

Manufacturer of products for the Horticultural industry since 1946

Installation Notes:

Required: a heavy hammer and corresponding drive rod. (available separately)

Highly Recommended: Pre-drill a 2" diameter pilot hole prior to installing the 680 and 880 kits.

The Earth Anchor is "set" for maximum holding capacity when it is perpendicular with the direction of the securing cable.

Anchor holding capacity is dependent on soil type and density.
