### Earth Anchoring Notes:

\*Capacity cited to be used as a guideline and was determined using average soil conditions. Holding capacities of any specific anchor will vary in different classes of soils. A good rule of thumb is the level of resistance when driving the anchor. Strong resistance typically results in solid anchoring.

**Easy to Drive-in = Easy to Pull-out and Hard to Drive-in = Hard to Pull-out.**  
**Highly recommended for BBEA 680 and 880 anchors: pre-drill a 2" pilot hole.**
